

Z-Band UltraSoft Wristbands

Healthcare providers can take a softer approach to patient identification with Zebra's patent-pending Z-Band® UltraSoft direct thermal adhesive wristband.

Featuring a soft, flexible material, Z-Band UltraSoft is the softest direct thermal wristband in the market. Z-Band UltraSoft also offers excellent resistance to most hand sanitizers, supporting patient safety by ensuring readable text and scannable barcodes for up to 14 days.

The Zebra® Z-Band UltraSoft direct thermal wristbands allow you to print patient information and barcodes directly on the wristbands.

A barcode that fails to scan or requires repeated attempts to scan jeopardizes patient safety and staff productivity. Zebra's supplies research team tested the image durability of Z-Band direct thermal wristbands to ensure optimum image durability and scanning performance.

For more details on the durability laboratory testing performed, please download our white paper on www.zebra.com titled "Laboratory Testing of Zebra's Z-Band® Direct Thermal Antimicrobial Wristbands."

The Softest Direct Thermal Wristband in the Market

Z-Band UltraSoft:

- Ultra-Soft wristband
- Adhesive closure
- Resistance to hand sanitizers such as Purell®
- Scannable up to 14 days

In addition, Zebra's Z-Band direct thermal wristbands:

- Feature a silver antimicrobial coating that protects the wristband.
- Are scannable for up to 14 days.
- Are quick and easy for staff to print and securely fasten in less than a minute using an adhesive tab or color clip.
- Are made of polypropylene and vinyl. The direct thermal imaging chemistry is composed primarily of leuco dyes and developers. The inks / varnishes used are UV varnishes and water based inks. There is no metal content in or on these particular patient identification bands. Therefore, Z-Band UltraSoft wristbands are considered to be MR-Safe.
